Multi-tenant Pylon Sign	One (1) double-sided sign with an LED display of 200 square feet on each side Height not to exceed 31 feet

ANALYSIS:

The applicant, Promotional Signs, Inc., is requesting a design review sign application for the site and architectural review of a new sign program that will create a unique and vibrant sign program with custom site-specific standards throughout the commercial center. The proposed sign program helps to integrate the design of signs with the overall building and landscape design to form an architectural statement. The applicant used common design elements from the approved buildings to create signs that are creative and unique to the Northgate Plaza. The project site is a rectangularly-shaped parcel located on the west side of Sierra Avenue and on the north side of San Bernardino Avenue.

Design Review Sign No. 22-041

As previously discussed, there are provisions to allow sign programs for shopping centers that are larger than six (6) acres. The sign program will now govern all future signage for the shopping center and meets the provisions of the chapter regarding sign programs including the purpose, applicability, and requirements to form a sign program.

The Northgate Plaza is a mixed-use property located on an approximately 7.04 acre that fronts Sierra Avenue and San Bernardino Avenue. The site is currently under construction for the newly approved Northgate Market and various pads. The applicant is proposing a sign program that will govern the signage on this site and will result in signage that will be proportional to the building sizes/heights. The sign program will function to provide unique and vibrant signage to the Northgate Plaza by using custom tailored site-specific standards that will complement the new shopping center. The applicant is proposing a pylon and monument signs that contains Spanish architectural details that will complement the buildings on site. To exemplify the common Spanish theme, the applicant will be using colored plaster as the main material in addition to decorative Spanish cotto tile and colorful hacienda tiles on the proposed pylon and monument signs. The applicant is proposing a decorative pylon sign with an electric message board component that will contain a sign area of 200 square feet on each side that will display onsite signage as well as feature City related advertisement. The applicant is also proposing a creative multi-ptylon sign with individual letters that spell "Northgate Plaza". This sign will also utilize decorative Spanish cotto tile. This sign will serve to give the shopping center a unique identity. The Northgate Plaza is a new shopping center that will have new and creative signage that will complement the shopping center.

MOTION:

Approve staff recommendation.
